

## ■ Compacting System

---

Processing a thin wire is no problem!

### Features

This system compacts edges of twisted wires by heating and pressurizing. This processing makes easy to weld a terminal of harness and a twisted wire for instance.

- Thin wire (0.8sq. min.) can be processed.
- Optimum electrode for your application can be custom-made.
- Caulking system that is capable of processing two wires simultaneously can be custom-made.

#### [Applications]

Copper twisted wire

1.25sq.-sized Sn-plated copper wire

Joining of a harness terminal and a twisted wire (After compacting)

### Specifications

Recommended size of wire	0.8sq. to 5.5sq.
Power supply	AC-controlled welding power supply, Inverter-controlled welding power supply
